Focused Packs

We have designed a variety of specialisation packs focused on different specific health objectives, which allow complementing and strengthening the **Rebalance** programme.

This allows us to design your programme according to the stated goal, in order to obtain more rigorous results, as well as improve certain aspects of your body and your general state of health, optimising the available time as much as possible.

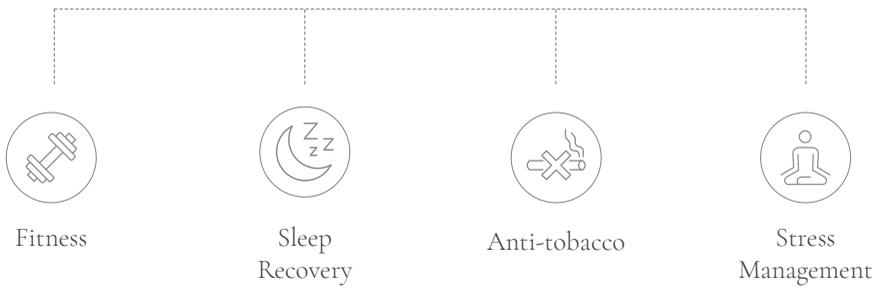

Rebalance

The Rebalance program can be contracted individually or complemented with one of the following Packs, in order to focus the desired results according to the specific health objective of the person.

Focused Pack Anti-tobacco

Thanks to strategies adapted to the physical and psychological conditions of the patient, rigorous medical follow-up and the application of medical treatments and natural therapies focused on addictions, this packs seeks to help guests stop depending on tobacco in a natural, healthy and controlled way. The goal is to recover the proper functioning of your body and avoid side effects of withdrawal and prevent relapse.

Staff also teach healthy habits that will strengthen guests' commitment to quitting tobacco permanently, and strengthen their motivation for a wider health recovery.
